S

208 bp reference window

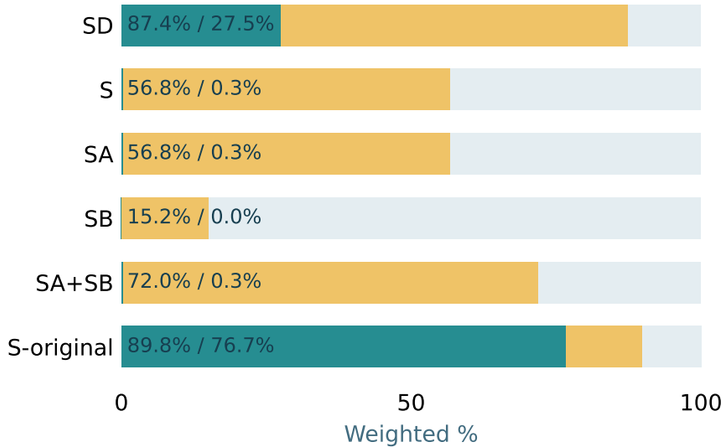
Primer matching · exact / mismatch-tolerant / missed

REFERENCE MATCHING

351 haplotypes · 151 taxonomic labels · grouped by order

COVERAGE & EXACT MATCH

Non-Apodida · label-balanced weights



Bar labels: coverage / exact matching

Exact match Mismatch-tolerant hit Not detected

Each heatmap column is one reference haplotype. A+B combines separate PCRs; reference span is not a universal product length.
